METHOD

The term “teaching method” refers to the assumptions and beliefs to teaching, to how the content is organised and presented and to the techniques and practices used for classroom instruction.

@SOSTEGNO_SPECIALE

METHODOLOGY

Methodology” refers to more than a simple set of methods: it means the study of pedagogical practices in general, including theoretical implications and related research. It includes what is involved in how to teach

@SOSTEGNO_SPECIALE

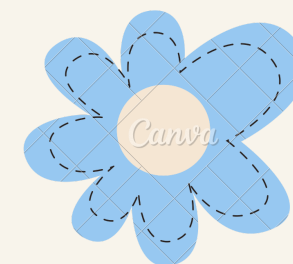

TECHNIQUE

Techniques describe specific
practical classroom tasks and
activities.

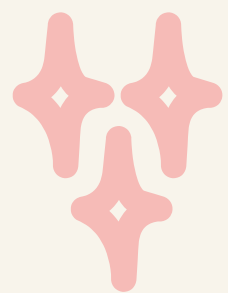

They refer to the way you engage
students

@SOSTEGNO_SPECIALE

REMEMBER

The right method doesn't exist.

Teachers have to be flexible and responsive
to adapt their teaching method.

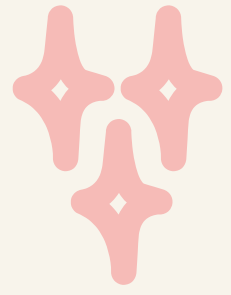

@SOSTEGNO_SPECIALE

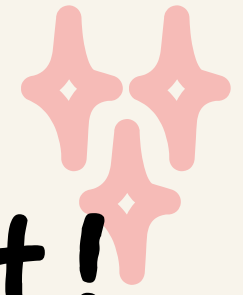

WHY?

Because students are different!

This is due to different learning styles,
different background, special needs

@SOSTEGNO_SPECIALE

WHAT CAN YOU DO?

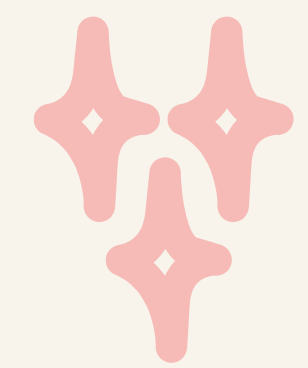

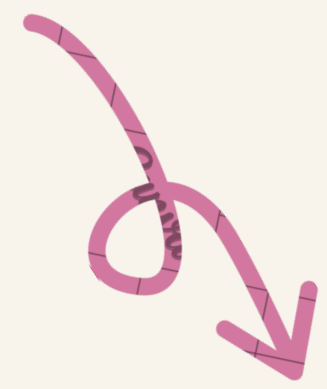

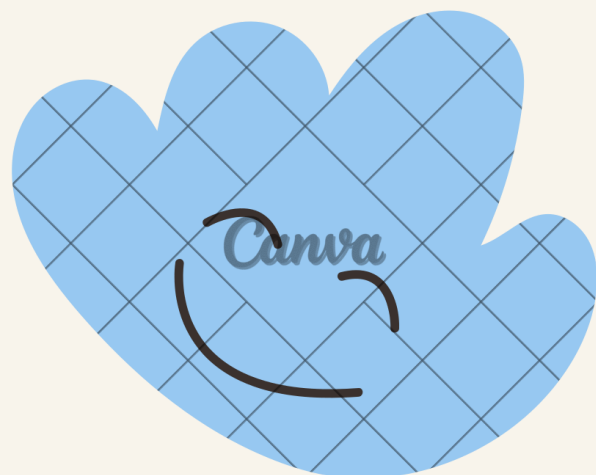

- you have to adapt your teaching methods to your students' needs
- you have to differentiate your instructions by modifying the content, the process, the activity

@SOSTEGNO_SPECIALE

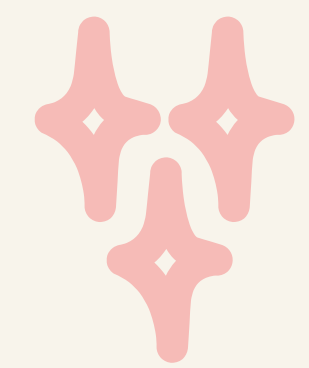

WHAT CAN YOU DO?

- you can integrate technology into your lessons
(platforms, apps, games, videos)
- you should involve students into the learning
process. This can increase their motivation and
responsability to learn

@SOSTEGNO_SPEZIALE

THANK YOU
